### VENUM ELITE BOXING SHOES YOU NEED THE BEST TO BECOME THE GREATEST

The right pair of boxing shoes will make a huge difference to your performance in the ring. Boxing shoes are often an underestimated part of the boxing game. Comfort, stability, mobility, power... everything about the way you box will change. Put on the right boxing shoes and you'll be lighter. You'll move faster. You'll hit harder.

Boxing is not just about punching...

## STUN HIM WITH YOUR FIST KNOCK HIM OUT WITH YOUR FEET,

#### GET FASTER GET UNPREDICTABLE

FIFXIBLE SHOFS & PROFILED SHAPE

The Venum Elite Boxing shoes have an incurved design on the front part of the outsole. This profiled shape allows you to throw yourself forward more easily. Like running shoes help to improve your stride, the curve of these boxing shoes will play an important part in your fighting stance. It will enable you to adopt a dynamic and offensive boxing style. You won't waste energy anymore. The great flexibility of the fabric will also increase your range of motion while the omnidirectional grip will ensure quicker & safer footwork.

Grasp the surface of the ring thanks to the slim sole of the Elite Boxing Shoes: the less distance there is between your feet and the floor, the more natural your footwork becomes. It will improve your balance and benefit your coordination and control. The sole may be thin, but the outsole gives the perfect amount of protection. The reinforced heel and lateral areas of the shoes are designed to seamlessly absorb shocks.

## APPROVED IN REAL FIGHTS PROTECTION & DURABILITY

After the product was developed, then came the real test: the Venum Team's top athletes wore them during their championship fights. Jorge Linares (WBA lightweight champion of the world), Juan Francisco Estrada and Miguel Berchelt (WBC champion of the world) were convinced by the efficiency and the durability of the Venum Boxing Shoes. More than your average pair of boxing shoes, the Elite offer unique protection thanks to their lateral reinforcements as well as their back ones. Your foot is protected during every movement you do, from your everyday training to the most intense fight of your life!
